

CONTINUITY MONITORING SERVICES

Consolidated Proactive Monitoring

- ✓ Multiple datapoints monitored ensuring maximum uptime
- ✓ Single consolidated dashboard for all manufacturers
- ✓ Increased reliability and meeting success

Lack of comprehensive Monitoring can leave issues undetected.

COMPLEX SOLUTIONS

Monitoring complex solutions requires specialist, dedicated expertise to achieve meaningful insights.

MULTIPLE PLATFORMS

Multiple vendors means multiple platforms, each requiring specific subject matter experts to get the most out of monitoring.

LATE DISCOVERY OF ISSUES

Without proactive monitoring, issues are often discovered once they've already impacted your business.

Let us be your eyes & ears.

No more guesswork with Monitoring.

- 1 More data points and analytics metrics available than from individual manufacturer's portals.
- 2 View the health of all of your monitored assets through your consolidated real-time dashboard.
- 3 Single point of contact for all monitored devices.

Ready for monitoring? Here's how we can help.

SCHEDULE A CALL

Contact us to speak with a specialist and review coverage options.

SURVEY YOUR ENVIRONMENT

Our experts capture all of the details, either remotely or in person to enable monitoring to get underway.

GET ONBOARDED AND ENJOY

Breathe a sigh of relief and stay focused on your core business.

Undetected issues are likely to result in downtime and reduced productivity.

Only discovering an issue once users are unable to have a successful meeting is too late. This causes a negative impact to your business and results in employees having reduced confidence in the solution.

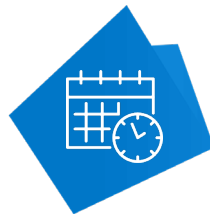

Give your employees the best experience.
